

## Minister's Medal Honouring Excellence in Health Quality and Safety

*Individual Champion Honour Roll*

**Suzanne Singh**

Suzanne Singh is a solo pharmacist integrated within a dynamic primary care team at the Mount Sinai Academic Family Health Team in Toronto. Suzanne is a passionate advocate of optimizing medication management in primary care through collaborative partnerships with patients and health care providers. She steers patient care initiatives focused on vulnerable patient populations at risk of medication-related problems and provides clinical expertise related to managing high-alert medications. She has also chaired the Mount Sinai Academic Family Health Team's Complex Patient Care Rounds and the Interprofessional Health Provider Committee.

Suzanne's work is rooted in working with patients to promote optimal medication therapy. One key example of this is her leadership in developing the Brown-Bag Medication Check-Up Program. The overarching goal of this program is to improve a patient's ability to self-manage their medications and to be their own advocates for safe and cost-effective medication use. Suzanne was also instrumental in establishing the family health team's Interprofessional Patient Care Committee.
